

Review of: "Graft Angiography Through Right Radial Artery: A Retrospective Cohort Study"

Povilas Jakuska

Potential competing interests: No potential competing interests to declare.

Your manuscript will be better if you elaborate on some points:

1. How much time passed between CABG surgery and graft angiography?
2. Table 2. The control group's angiography was performed via the femoral artery. How did you manage to find 20 radial artery occlusions in this group?
