Dear Author,

the manuscript 'Somatostatin and the pathophysiology of Alzheimer's disease is a very valuable work. It contains detailed description of the AD pathophysiology and the role of somatostatine in it,

There are only some minor suggestions, please find them here below:

1. From the references' list the followings are missing: Prince et al. 2015, Kasai et al. 2010, Querzfurth et al. 2010, Hirtz et al. 2007, Anderson et al. 2020
2. list of abbreviations should be added e.g. because of APP, APOE, BACE1, MCI, DMN, PS1
3. in section 3 under in conclusion and 3.4 Ab is seen instead of A of A $\beta$

Kind regards
