Anti-GD2 Monoclonal Antibody MORAb-028

National Cancer Institute

Source

National Cancer Institute. *Anti-GD2 Monoclonal Antibody MORAb-028*. NCI Thesaurus. Code C91383.

A human IgM monoclonal antibody directed against disialoganglioside GD2 with potential immunomodulating activity. Upon administration, anti-GD2 monoclonal antibody MORAb-028 may stimulate the immune system to exert a complement-mediated cytotoxic response against GD2-expressing tumor cells. The glycosphingolipid GD2 is a tumor associated antigen (TAA) overexpressed on the surface of many cancer cells.
