Review of: "From Coherence to Control: A Non-Systematic Approach to Multi-Parametric Phenomena"

Miloš Milovanović¹

1. Serbian Academy of Sciences and Arts, Belgrade, Serbia

The paper is very interesting, but it lacks organization in quoting references. This is especially obvious in the first paragraph of Section 4, wherein quotes have been thrown in with no order.

The elimination of time and complexity is most visible in the heliocentric system, which has come to be a synonym for the reductionist paradigm. I recommend a paper that has elucidated the topic.

https://www.ejst.tuiasi.ro/Files/40/3_Milovanovic.pdf

On the other hand, the relation to an aesthetical criterion is not sufficiently elaborated. Both a link with art as well as with fractal geometry is going to emerge here. I recommend the paper elucidating the issue.

The author should consider both papers and edit the quotations in the text.
