# Serine/Threonine-Protein Kinase ICK

National Cancer Institute

## Source

National Cancer Institute. *Serine/Threonine-Protein Kinase ICK*. NCI Thesaurus. Code C150263.

Serine/threonine-protein kinase ICK (632 aa, ~71 kDa) is encoded by the human ICK gene. This protein plays a role in serine/threonine-protein kinase activity, ciliogenesis and intraflagellar transport.
