**Potential competing interests:** No potential competing interests to declare.

- The abstract effectively introduces the research, its objectives, and the methodology employed. The explanation of the Black Box model is not clear. Additional clarification is needed to enhance understanding.
- Grammatical errors can be avoided to have an ease of understanding
- The work lacks novelty, and the simulation part is not sufficiently clear. It would be beneficial for the authors to include more details, such as operating points and clarification on the control variable.
