

Review of: "Persimmon Preservation: Navigating Tradition, Innovation, and Sustainability for a Holistic Future"

Ajab Khan Tareen

Potential competing interests: No potential competing interests to declare.

My recommendation is to publish with minor revision and carefully checking all mistakes as mentioned bellows:

Authors must clearly indicate the cultivars studied in this research.

Section processing techniques: Prior to varietal description of the persimmons, mention the names of described varieties in one line. While discussing the preservation methods for different cultivars of persimmon, each cultivar was presented with one or more particular preservation method but it is not clearly stated that why different preservation methods are used for different cultivar-provide a logical reason.

Factors Influencing Persimmon Shelf Life: Abbreviations like UV-B, UV-C and USDA were used, write their full form also.
