Well planned research and well written article.

1. Abstract need to be organized into background, aim, methodology, results and conclusions
2. Theoretical framework of other authors was mentioned in the background. How far it is relevant to the present quantitative study?
3. Authors mentioned that the questionnaire items were created by them from different published articles, but they did not mention what were the instruments used by the referenced author. Some more details on methodology gives a clarity, the author's created scale, if given a name for the tool, may be included as supplementary data.
4. In the demographic data, why the marital status was taken, was there any impact on student satisfaction and marital status of the study population?
5. How the sample size is derived? explain how the sample size is enough for the study?
6. Please mention strengths and weaknesses of the study.
