Potential competing interests: No potential competing interests to declare.

Generally, the work exhibits a methodical approach but lacks sufficient context and commentary to enhance the

Examine the accuracy and understanding gained from study. Kindly inform me if you require any further elucidation or possess supplementary inquiries.

Recommendations for enhancement:

Elaborate on the literature review that establishes the connection between augmented reality (AR) technology and student engagement and learning results.

Please provide additional information regarding the sample selection process, including details on the level of randomization employed and the demographics of the sample.

Take into account supplementary quantitative metrics apart from assessments such as scales measuring user involvement.

Gather qualitative observations from the control group as well in order to conduct a comparison study.

Analyze and compare the results of surveys and interviews to draw consistent conclusions.

Examine the constraints of the study's design, data gathering, and analysis procedures.
