Potential competing interests: No potential competing interests to declare.

- 1) Affiliation of the authors should be aligned before the abstract.
- 2) The paper should be properly checked for typos and grammatical mistakes.
- 3) Literature survey is found missing .
- 4) The reference should be properly cited in the manuscript.

Result analysis, conclusion and Overall evaluation

- 1) Need to improve result analysis and discussion and compare the result with the current previous work.
- 2) Highlight limitation of this study in conclusion section.
- 3) The figure quality is poor and that should be improved.
- 4) The figure should be explained in detail in the text.
- 5) Figures taken from the third party source should be cited in the text as well as properly referenced.
