Potential competing interests: No potential competing interests to declare.

Thank you for choosing me as a reviewer for this article. This review focuses on stem cell-based therapies for Severe COVID-19 infection. The review is well-written, and the findings are largely up to date. I only have minor comments that may help clarify the text.

1. In Fig. 1, the word "beings" is better deleted from the legend.
2. Please check the text carefully and improve your English so that people can read it without misunderstanding and confusion. Some statements require modification/rephrasing, for example, in the text on pages 19, line 5, and page 20, lines 4-8. It would be better to recheck the other pages as well.
3. Adding more discussion (the author's own opinion) is encouraged for the manuscript.
4. A graphical abstract is encouraged.
