

# Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Kaustubh Bhattacharyya<sup>1</sup>

<sup>1</sup> Assam Don Bosco University

**Potential competing interests:** No potential competing interests to declare.

1. The abstract of the Manuscript is more quantitative; it would be better if that quantification is given in the Conclusion.
2. The Title, Abstract, and keywords are proper.
3. The Author has introduced the topic properly.
4. It would be better if the author could consider some more related work. References are lacking.
5. Proposed work is justified correctly.
6. The impedance matching results are missing.
7. This paper can be accepted for publication.
