Beyond Boundaries: Exploring Livability in Diverse CPTEDEnhanced

Neighbourhoods of Bengaluru

Though the topic is interesting and some details of the content seems ok, the article is not in shape to be published because of the following:

Abstract

Good, needs formatting

Referencing

The author included initials of some authors intext, which is not acceptable

References are mostly 20 years and above, a more current literature should be employed as well

The heading for section 1.3 should be replaced with 1.3.1

The author used most parts of page 6 to explain the concepts used in the study. This should be done at the introductory section. Explanations of concepts cannot be given a page in an article

The analysis is scanty and all boxed into one, especially with the figures. The conclusion is so brief as well.

The article is writing like a project work or a thesis. Journal articles have unique structures so author should re-arrange the headings
