Potential competing interests: No potential competing interests to declare.

It is necessary to address the following points:

What is the innovation of the article in terms of subject and method?

The main part of the article is the addressing the model and estimation, which is not particularly necessary.

Please add the theoretical basis of the topic.

It is necessary to mention some stylized facts in the field of Nigerian economy.

The analytical aspect of the results should be strengthened according to the theoretical and experimental foundations.

Regards,
