Thank you for the revision had been made. I found that most of my comments had been addressed properly. However, there are two things I would like the authors consider:

1. The Abstract is still too long. Please be precise in writing the Abstract as most people will only read the abstract of a paper before digging in.
2. There are many missing number values or misplaced commas in the Results section. For example **1,22,90,180, 59,14,621, etc. Please recheck all number values in the text.**
