Potential competing interests: No potential competing interests to declare.

This paper looks accepted with minor corrections as follows:

1. The abstract should contain three parts, including (objectives, methodology, and results).

2. The introduction should contain what related works do and what the current authors developed.

3. The results are not so clear and need more details.

4. The references are required to add more modern approaches within 2020 to 2023
