Potential competing interests: No potential competing interests to declare.

This work is about the pandemic of COVID-19, and again, it is spreading.

My general comments are:

- English should be double-checked; several typos were found.
- The statistical analysis of the data is missing, or you can elaborate more for better understanding.
- The main hypothesis mentioned above has not been justified either by a theoretical model or from an epidemiological point of view.
- In the Materials and Methods section, you must explain the inclusion and disclosure criteria.
