Achieved master's or equivalent level

Behaviour Change Intervention Ontology (BCIO)

Source

Behaviour Change Intervention Ontology (BCIO)

Definition: A highest level of formal educational qualification achieved after participating in an education process which has as a prerequisite an undergraduate degree and which is intended to result in the acquisition and development of advanced academic or professional skills and knowledge in a specialised discipline, that culminated in the award of a Master's or equivalent degree.

Comment: A highest level of formal educational qualification achieved that is a master's or equivalent level education. Entry into master's (ISCED level 7) programmes preparing for a second or further degree normally requires the successful completion of an ISCED level 6 or 7 programme. Additionally, it may be required to take and succeed in entry examinations. Programmes at ISCED level 7, or Master's or equivalent level, are often designed to provide participants with advanced academic and/or professional knowledge, skills and competencies, leading to a second degree or equivalent qualification. Programmes at this level may have a substantial research component but do not yet lead to the award of a doctoral qualification. Typically, programmes at this level are theoretically-based but may include practical components and are informed by state of the art research and/or best professional practice. They are traditionally offered by universities and other tertiary educational institutions.

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
