Potential competing interests: No potential competing interests to declare.

This article is an introductory and descriptive piece about representations of Lie groupoids on bundles, which consists of only a few definitions and examples, and there are no concrete results in it.

The abstract of the article is vague and does not specify the purpose or content of the article. In the abstract, the word "discussion" is mentioned, but there is no explanation or conclusion about the topic except for the definition and example of the discussion.

The purpose of bringing the definitions, especially the definitions at the end of the article, is not clear.
