Potential competing interests: No potential competing interests to declare.

In general, this article can provide a good overview of the themes raised, but there are several notes that could be improved.

1. In the "Abstract" section, it needs to be more synchronized with research findings.
2. In the "Results and Perspectives" section, further explanation/detail regarding the results of the research needs to be provided, and a broader perspective is needed.
3. In the discussion section, a clearer narrative is needed about further research that must be carried out related to this theme.
