

Review of: "Primary and Secondary Effects of Statin on Cerebro-Cardiovascular Disease Using the Nationwide Health Screening Data"

Gwo-Ping Jong

Potential competing interests: The author(s) declared that no potential competing interests exist.

1. There is a study which appeared to have used the same dataset to address a similar research question [Reference 20] and have arrived at the similar conclusion.
2. The description of the data [NHIS-HEALS] should be expanded to help readers understand the data source used.
3. Why were people who indicated for primary prevention of CVD included from the study?
