The idea of this paper '**Necessity of budget deficit in a growing economy where people hold money and leave a bequest**' seems interesting and going to make a valuable contribution. But, I want the authors to improve upon the following dimensions:

1. The title of the paper is attractive, but the introductory part of the study did not clear novelty or research gap properly.
2. The authors did not write a standard abstract. Policy suggestion part is missing from abstract. The authors should mention at least one or two policy suggestion based on the findings.
3. The authors need to justify the results from previous study whether the conclusions are in the line or different from previous work.

In my view all sections of this paper explained well except a few points which are mentioned above. I would strongly recommend, this paper should be accepted for your journal after making a said revision.
