

Review of: "Targeting Alzheimer's disease hallmarks with the Nrf2 activator Isoeugenol"

Hans Christian Siebert

Potential competing interests: No potential competing interests to declare.

The draft of Ana Silva, Sónia Silva, Jéssica Macedo et al., which is entitled <u>Targeting Alzheimer's disease hallmarks with the Nrf2 activator Isoeugenol</u>," describes a solid study with convincing results. I am pretty sure that this research article will be of interest to the readership of the scientific journal Qeios. However, the authors should try to discuss their results in an even broader context. This publication could help:

Kunnumakkara AB, Sailo BL, Banik K, et al. Chronic diseases, inflammation, and spices: how are they linked? Journal of Translational Medicine. 2018 Jan;16(1):14. DOI: 10.1186/s12967-018-1381-2. PMID: 29370858; PMCID: PMC5785894.
