

Review of: "Comparative Analysis of Sustainable Livestock Development as a Source of Livelihood to Farmers of Maharashtra and Jammu and Kashmir"

Lucia Sepe¹

¹ Council for Agricultural Research and Agricultural Economy Analysis

Potential competing interests: No potential competing interests to declare.

The author describes the scenario of livestock production in the two areas with a multidisciplinary approach. On one side, the actual situation; and on the other, the perspectives of development of demand and offer, considering many issues, among them the security of food and income. In general, the manuscript is well-written, clear, and easy to read. However, some issues need attention. Some are formal issues, others concern the Tables, and others the References: they are all highlighted and detailed in the pdf attached.

Just a suggestion: the Author might consider the opportunity to include the issue of slaughtering centers' safety (Major challenges facing the livestock sector, point 3) among the Future strategy.
