

# Review of: "Collective Guilt and the Search for Meaning in Post-Communist Albania: An Existential Perspective"

Urwah Ali<sup>1</sup>

<sup>1</sup> Foundation University Islamabad

**Potential competing interests:** No potential competing interests to declare.

1. Introduction is so brief (1 page only?) any justification for that?
2. Most citations are old, need to add recent researches.
3. There is no Rationale of the study?
4. Literature Review must come after Introduction heading and then followed by Research Questions.
5. On page 5, this needs to be mentioned, how narrative data was collected. Procedure of contacting participants and ethical considerations need to be mentioned.
6. Where the results and themes are mentioned, some verbatim need to be written.
7. Strengths and limitations of the study is written excellently.
8. Study' theoretical and practical implications need to be cited.
