Pointer

National Cancer Institute

Source

National Cancer Institute. *Pointer*. NCI Thesaurus. Code C53895.

The Pointer, also known as the English Pointer, is powerful with a long neck and a well-muscled, athletic body. The medium-sized ears are pendant and somewhat pointed. The short, shiny coat comes in primarily white, but may be liver, lemon, black or orange, and solid, patched or speckled. Height: 21-24 inches (54-62 cm.) Weight: 44-66 pounds (20-30 kg.)
