# Cetirizine Hydrochloride

National Cancer Institute

## Source

National Cancer Institute. *Cetirizine Hydrochloride*. NCI Thesaurus. Code C28920.

A synthetic phenylmethyl-piperazinyl derivative, antihistaminic Cetirizine is a metabolite of hydroxyzine and a selective peripheral histamine H1-receptor antagonist. It is used for symptomatic treatment of seasonal and perennial allergic rhinitis and for chronic urticaria. (NCI04)
