# Review of: "Mechanisms of Glycolysis and Fermentation: A Non-Equilibrium Thermodynamics Perspective"

John Moffett<sup>1</sup>

1. Anatomy, Physiology and Genetics Department and Neuroscience Program, Uniformed Services University of the Health Sciences, Bethesda, United States

I believe the manuscript has been significantly improved. The authors may want to make a final check of the figures; for example, in Figure 3, the label at the top right side reads "energyparticledynamics" as a single word, rather than 3 words.

I recommend publication.
