

# Review of: "Aligning Government Initiatives with Sustainable Development Goals: A Village-Level Mapping in India"

Dr. T Amose<sup>1</sup>

<sup>1</sup> The American College, Madurai

**Potential competing interests:** No potential competing interests to declare.

1. The author has taken congratulatory work.
2. The selected sample size is not grouped by sampling technique.
3. Total sample size seems conflicts compared to that given in the methodology (287) and table No. 01 (228).
4. While this study covers the landholders, a question is arising: do all the people in the study area have lands?
5. Refer to table No. 05. What are other households? Justify.
6. What is your sample, either households or people? Remember, households have never been a sample (may be a member in the household). Contradiction in Table No. 01, 05, and methodology.
7. Under the part of discussion and conclusion, the third paragraph's first line starts with 'Your study has .....'. Justify it.
