Good job! I hope you take into account the following recommendations:

1. Add more information about the different existing methods in refrigerant selection.
2. Highlight and describe why each method is important. Finally, explain the benefits of using each selection method.
3. Specify which refrigerant selection attributes should be considered with greater emphasis, based on your research.
4. According to the authors, the method works for a wide variety of fields. How did you come to this conclusion?

Shape:

1. They could improve the presentation format of the matrices. If they are presented as images, they should be numbered.
2. The last reference uses a different bullet style.
