Potential competing interests: No potential competing interests to declare.

In Introduction, the authors should indicate more clearly which compounds have already been reported in the literature and which are new. Describe what is known effects of structure on antimicrobial activity from the literature.

In Abstract, is mentioned that "structures of the products were ascertained by spectroscopic data", but in the Experimental part and Results, only ¹HNMR and IR are described. Provide NMR spectra, ¹³CNMR spectra should also be included.

In Results and discussion, should be given additional explanations related to the influence of chemical structure on pharmacological activity.
