Dear Authors,

Firstly, I would like to extend my congratulations on your manuscript, which addresses a trending subject. Nonetheless, upon reviewing your work, I have identified several areas that require improvement. I would like to highlight the following points:

Methodology: It is crucial to include the full methodology used in your study. This section should clearly outline the research design, data collection methods, and any analytical techniques employed. The absence of a well-defined methodology makes it challenging for readers to evaluate the validity and reliability of your findings.

Literature Review: I recommend expanding your literature review to include a comprehensive discussion on the impact of digitalization in different economies. By including relevant studies and theories from various regions and industries, you can provide a broader understanding of the subject matter and enhance the significance of your research.

Conclusions: It is essential to ensure that your conclusions align with the main objectives of your study. A strong conclusion should summarize the key findings and their implications, highlighting how they contribute to addressing the research questions or objectives stated at the beginning of your manuscript.

By addressing these points, you can strengthen the overall quality and impact of your work. I wish you the best of luck in revising your manuscript.

Sincerely,

Said
