**Potential competing interests:** No potential competing interests to declare.

The central premise of this paper is to provide some information and a comprehensive and broad account of social work. I believe this paper, while presented as a qualitative study, reads like a literature review. In the qualitative account, there is limited discussion of the methods used to glean the information. This needs to be reframed, and methods need to be more specified, and the goal of the paper needs to be more clear before it is a publishable piece.
