# Cicletanine

National Cancer Institute

## Source

National Cancer Institute. *Cicletanine*. NCI Thesaurus. Code C77557.

A dihydropyridine derivative with diuretic and antihypertensive activity. Cicletanine exerts thiazide-like diuretic activity. In addition, this agent inhibits protein kinase C (PKC) and is able to reverse vasoconstriction through the inhibition of PKC-mediated inhibition of Na/K-ATPase phosphorylation.
