Dear and respected and honorable author

1. What is the novelty of the reported research work?
2. What is your antenna analysis method? In the text of the article, you have not mentioned the analytical method. Please explain about this.
3. For the validation of the reported work, either HFSS or circuit modeling should be provided.
4. E-field distribution, H-field distribution, and surface current distribution curves are not reported at the central frequency in the article. The results of the mentioned curves must be provided.
5. The quality of all curves should be improved. Please replace the images with high-quality versions.
6. What is the polarization of the designed structure in the article?

Good luck, thank you
