

# Review of: "Women In Slum Risking Their Safety To Access And Usage Of Basic Water And Sanitation Facilities"

Chandan Roy

Potential competing interests: No potential competing interests to declare.

The manuscript is very important for addressing women health and well-being in slums area of India. This manuscript provides insightful information about access and usage of basic water and sanitation facilities and their association with women's safety and health risks. However, some improvement is required to make it more scientific publication. Please check my suggestions below.

## Women In Slum Risking Their Safety To Access And Usage Of Basic Water And Sanitation Facilities

### 1. Abstract

#The authors just ignored the materials and methods section in the abstract. You have to be very clear about data source and methodology that you have in your research. Please include the suggested section in your abstract.

# "This paper is an attempt to solve problems related to women's safety while accessing or using basic water sanitation facilities."

- The revised sentence should be - This paper is an attempt to solve problems related to women's safety while accessing or using basic water and sanitation facilities.

### 2. Introduction

# Please mention the strengths and weakness of your research in the last paragraph of Introduction. In addition, you are requested to mention future research. In addition, please add more comparative literature in the 'Introduction' and 'Discussion' to justify your findings with previous published scientific articles.

### 4. Data Analysis

As I know data analysis means- "Data analysis refers to the process of inspecting, cleaning, transforming, and interpreting data to discover valuable insights, draw conclusions, and support decision-making." Please check the data analysis section carefully, if it is applicable make the required changes in the revised manuscript.
