Potential competing interests: No potential competing interests to declare.

The article deals with a subject of interest to agricultural activity, so it is appropriate to make some improvements. I would like to thank the authors for their contribution in this regard.

With the intention of improving the document, I propose the following suggestions:

1. Review grammatical structure to shorten sentence length and avoid repeating words. For example, in the abstract, "we have," "such," and "result" are repeated in the same sentence. Check typographical errors too.
2. Specify the objective of the article in the abstract.
3. To facilitate comprehension, the structure of the article could be improved, for example, by organizing the text into Introduction, Materials and Methods, Results, Discussion, and Conclusion.
4. It should be noted that the references used try to be very current; however, there are some references cited in the text that I have not found in the Reference section, such as Zhao, et al., 2021; Janus and Ertunc, 2021; Huang, et al., 2020; UN., 2022. Please check all the cited references. In addition, there are two references that should be differentiated, including, for example, a letter:
 - i. Sadaty, S.A. 2022. Porosity with the approach of biological and physicochemical diversity barriers in soil. Science Development Publishing Center (Studies and Research Unit). www.copdsiran.org (In Persian)
 - ii. Sadaty, S.A., 2022. Reflection of traditional farming operations on the sustainability of the main components of internal and external soils systems in the upstream elevation regions of Mazandaran province, Iran. Resources, Environment and Sustainability. 10, 100088

When there are two authors, sometimes they are cited in the text including the word "and," sometimes not: Chaudhary, M.T., and Piracha, A., 2021; Yue, X.L., GAO, Q.X., 2018.
