

# Review of: "Artificial Intelligence and Digital Technologies in the Future Education"

JungWon Yoon

Potential competing interests: No potential competing interests to declare.

- I find the topic of your paper to be quite interesting. However, I believe that the scope of the paper is too broad. It would be more beneficial if you focused on specific research questions within the topic.
- I suggest improving the Introduction by clearly demonstrating how the subtopics in sections 2-4 are logically related. This would help provide coherence to the overall paper.
- Regarding Figure 1, I feel that it is not necessary for the Introduction. Instead, a concise description in one or two sentences would suffice.
- In regards to the Abstract, I noticed that the first sentence is mentioned in the Introduction with citations. I recommend rewriting the Abstract to reflect the authors' own ideas and findings, providing a brief overview of the paper's objectives and main results.
- Additionally, I noticed several typos throughout the paper. For instance, in the Abstract, I found "Thepaper," "isinvestigated," and "Computingin." I suggest carefully proofreading the entire manuscript to correct these errors.
- I hope you find these suggestions helpful in improving your paper.
