

Review of: "Youth Attitudes Towards the Effects of Social Media Addiction: A Study on College Students in the United Arab Emirates"

Subramaniyan Manochandar

Potential competing interests: No potential competing interests to declare.

The research article is good and results show are very useful to the youth

The paper is acceptable

Few queries:

1. Table 5 and 6: All the correlation values are less than 0.5. Please justify.
2. **"H1: There are statistically significant correlations between the excessive use of social media by Arab youth respondents and the negative effects on their mental health, social relationships, daily duties, and tense feeling."** Hypotheses stated that negative effects, but the results show more positive values. Please clarify.

Thanks
