

# Review of: "The Relationship Between Attitudes Toward Classroom Learning and Attitudes Toward Digital Classroom Learning"

Usha Yadav

Potential competing interests: No potential competing interests to declare.

1. Some sections could benefit from additional clarity, particularly in explaining the connection between attitudes toward traditional classroom learning and digital classroom learning.
2. Could work more on research paper language writing skills.
3. More recent references to existing research would strengthen the argument for the study's relevance.
4. The sampling process and the choice of instruments need more justification. It would be helpful to explain why certain methods were chosen and how they ensure the reliability and validity of the results.
5. Consider providing additional statistical analysis or visual representations (e.g., charts or graphs) to make the findings more accessible and impactful.
6. Implications of the findings would be beneficial if they could connect the results more explicitly to the literature mentioned.
