Potential competing interests: No potential competing interests to declare.

The paper has significant importance and is related to original research.

- Fig. 6 should not be a screen copy, and it must be easily readable.
- Data and study area should be explained in Ch. 3, not 4.
- At the conclusion, the author should compare his results with other scientific papers and their results,
- At references, some papers published in 2024 should be added.

With kindest regards,

Z. ASLAN
