"Redefining the Concept of e-Government Program. A Review of the Literature" which is interesting topic of review but it is not current. As the area is dynamic, the reviewer should consider recent works starting from 2019-2023 instead of using older works. therefore, I recommend the author to work again by considering recent literature. He should also state the method followed for the literature review including which databases are considered and how he filtered the articles for review .
