Potential competing interests: No potential competing interests to declare.

1. Your topic of interest addressed is of such relevance to public spaces knowledge from other regions of the world, however, I have comments regarding the article that will lead to be better.
2. Abstract: The sentences are too long towards the end of the abstract and the overall abstract is not well articulated. it needs to re-write.
3. Structure: In most parts, it is explained in the form of news sentences. In addition, the writing of the text is confusing. There is no proper connection between the parts. If it is possible re-reading and re-writing as if you were following a flow of reasoning when telling a story.
4. Figures: I expected more figures showing the expansion or connection of urban spaces created. the quality of sketches and figures should be improved. The title of the figures must be mentioned in the text.
5. Methodology: The method should be emphasized more
6. References: References other than those for the illustrations appear to be correct.
7. Language: The paper is easy to read and understand while, there are a few spelling and grammar errors.
