## Literature Review

*It is recommended that the currency to be used is US dollar.*

*The literature review does not discuss the theoretical propositions that deal with "sustainable survival strategies" and the meaning of "Threats and Opportunities and how these constructs this affect the strategies" at the very least. These propositions should be described and discussed before describing the bakery industry in Nigeria.*

### **Presentation of Data, Analysis and Interpretations**

*FSLC, WASC, OND, OND, NAFDAC. What do these acronyms mean? You must specify and explain them.*

*You start a paragraph by saying: "Another significant finding..." Another? What finding(s) precedes it?*

### **Methodology**

*Where is the description of the Research Methodology? It is mandatory that a scientific article has this item, the kind of research you did (quantitative or qualitative), why you choosed this kind, how the bakeries were selected, how the data was collected (primary and secondary data), if interviews were conducted, who the interviewees were, how long the average interviews lasted, at least.*

*It is necessary for the analysis, conclusions and recommendations to be deeper.*
