Potential competing interests: No potential competing interests to declare.

The article if improved upon can be quite interesting. The following are some important points to consider:

Introduction:

- The references though not recent are limited to support the major motivation of the work.
- Each application should be supported by a reference.

Experimental

- Be more specific with the sources of the reagents used in the work for the purpose of reproducibility.
- The synthetic procedure should specify the difference precursors used.
- Monitoring with TLC plate without indicating the solvent system used.

Results and Discussion.
