

Review of: "Refrigerant Selection in Air Conditioning Systems Considering Thermodynamic, Environmental, and Economic Performance Using the BHARAT-II Multi-Attribute Decision-Making Method"

Sameer Sheshrao Gajghate

Potential competing interests: No potential competing interests to declare.

1. While the authors have applied the Bharat-II attribute decision-making method in their study, it would be beneficial to provide a brief introduction to this method for a clearer understanding by readers.
2. Comparing results across various studies is appreciated. However, the novelty of the study could be better emphasized. Strengthening the content related to the novelty would enhance the paper.
