

# Review of: "Assessing Reliability and Economic Viability of Different EV Charging Station Configurations"

Xian-long Ge

**Potential competing interests:** No potential competing interests to declare.

This is an exciting study. As clean energy transportation vehicles, electric vehicles have broad application prospects, but there are still many obstacles to their development. Electric power supply is one of them. The manuscript has a complete structure and clear expression, but the possible flaw is that the workload of the core content of the manuscript is relatively low. It is expected that the author will enrich the expression in Chapter 34.
