Dear editor,

thank you very much for your e- mail and please accept our apologies for the delay in responding to it .

In my judgment, this manuscript contains some comments. The authors have to address the comments as follows

While this application is of potential interest, the quality of the characterization data is low and thorough interpretation of the existing data is missing in many places. Therefore, review are necessary if the work is to be published .

1. The abstract section contains punctuation errors and incomplete sentences. In addition, It is recommended to make additions related to this subject so the reader can understand the study more clearly.
2. Use Abbreviations appropriate to the work done.
3. English abbreviations should be written completely first in abstract.
4. It should be arranged in terms of spaces between units and words and the use of uppercase and lowercase letters.
5. Abbreviations should be used correctly throughout the text.
6. Text alignment and extra spaces between words should be arranged in the texts specified for tables and figures
7. In the materials and methods section, the experimental methods used within the scope of the study are presented in detail. In this context, it is recommended that the details of the relevant test be given concerning the literature.
8. In the conclusion section, the data and results obtained from the study are summarized and presented. However, the purpose of this study was not expressed well enough. In this context, it is recommended to rearrange the conclusion text by paying attention to the specified regulations.

Kind Regards ...
