**Potential competing interests:** The author(s) declared that no potential competing interests exist.

When it comes to regional development, I would never have thought of ADB as a force because the visibility of ADB here is not high here in Malaysia. This paper evokes exactly that: what is the relevance of ADB in current times? It's fascinating to see what ADB has right now, as well as the challenges they face. This is an interesting topic, and this paper is well written.
