Potential competing interests: No potential competing interests to declare.

The research required more explanation

1. Study design should be added to method section "case-report" .
2. Although rare, but post-vaccination stress may cause some minor cardiac problems. The author should describe the impact of COVID-19 on mental health in the introduction section . The author could use the following references <https://doi.org/10.3389/fpsyt.2021.774504> <https://doi.org/10.18549%2FPharmPract.2022.3.2689>
3. These adverse effects may be due to vaccines or may be associated with stress which is common after COVID-19 vaccination.
4. Method section required more explanation, especially to general information related to the case such as, age , other socio-demographic information and health status .
5. Discussion section required the addition of some comparative studies with similar or different results.
